

Prayank Gupta

Data Analyst | AI-Assisted Analytics

Bengaluru, Karnataka | +91 9582182726 | prayankgupta2@gmail.com

Portfolio: prayank94.github.io | GitHub: github.com/prayank94 | LinkedIn: linkedin.com/in/prayank94

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience building automated analytics solutions, ETL pipelines, operational intelligence systems, KPI monitoring frameworks, AI-assisted reporting workflows, and business intelligence solutions across ERP, fintech, onboarding, customer operations, and business process domains.

Experienced in developing scalable reporting systems, workflow automation frameworks, operational analytics solutions, and decision-support systems using Python, SQL, PostgreSQL, APIs, Power BI, and modern analytics practices.

TECHNICAL SKILLS

Languages: Python, SQL, PostgreSQL

Analytics: Pandas, NumPy, Exploratory Data Analysis, Statistical Analysis

Data Engineering: ETL Pipelines, Data Transformation, Data Validation, Data Reconciliation, REST APIs, API Integration, JSON Processing, CSV Processing, Workflow Automation

Databases: PostgreSQL, Query Optimization, CTEs, Window Functions, Joins, Subqueries, Data Modeling, Data Warehousing Concepts

Business Intelligence: Power BI, Tableau, Looker Studio, Dashboard Development, KPI Reporting, Operational Analytics

AI & Advanced Analytics: OpenAI API, LLM-Assisted Analytics, Prompt Engineering, Automated Insight Generation, Sentiment Analysis, Text Analytics

Tools: Git, GitHub, VS Code, Excel, Google Sheets, Jupyter Notebook

Cloud & Modern Data Stack: BigQuery, Snowflake, Airflow, dbt, PySpark, Databricks, AWS, Azure

PROFESSIONAL EXPERIENCE

NoBrokerHood Pvt. Ltd. | Data Analyst (Insights) Jun 2024 – Present

- Built automated analytics and reporting solutions supporting ERP, onboarding, customer support, inventory, transactions, society operations, and business workflows.
- Developed ETL pipelines using Python, SQL, REST APIs, CSV, JSON, and Google Sheets to integrate and transform operational data from multiple business systems.
- Designed reusable data validation, transformation, reconciliation, and workflow automation frameworks to improve data quality and operational efficiency.
- Developed advanced SQL analytics using joins, CTEs, window functions, ranking, aggregations, and KPI reporting to support operational decision-making.
- Built interactive Power BI dashboards and automated reporting solutions used by 100+ stakeholders for customer support, operational performance, and business insights.

Designed analytics workflows for customer support data involving ticket analysis, categorization, SLA monitoring, trend analysis, and executive reporting, leveraging AI-assisted techniques for summarization and operational insights.

- Reduced monthly operational processing timelines from 1–2 days to under 30 minutes.
- Improved dashboard performance by more than 80% through backend optimization.

Poonawalla Fincorp Ltd. | Data Analyst (Operations) Nov 2023 – Jun 2024

- Performed SQL-driven analysis of onboarding, verification, and operational workflows.
- Developed reporting solutions supporting KPI monitoring, workflow tracking, and process optimization.
- Improved workflow efficiency through automation initiatives, reducing pendency by 5% and lowering new case inflow by 12%.

FA Gifts Pvt. Ltd. | Search Engine Marketing Analyst Mar 2022 – Oct 2023

- Analyzed campaign performance, customer behavior, conversion trends, and revenue metrics.
- Delivered revenue growth through audience segmentation, campaign optimization, and performance analysis.

IGT Solutions Pvt. Ltd. | Associate Analyst Jan 2021 – Mar 2022

- Analyzed customer satisfaction, service quality, and operational performance datasets while developing KPI reporting solutions.

PROJECTS

Customer Success Intelligence Platform

- End-to-end enterprise analytics platform simulating customer success operations with SQL Server, Python, Power BI and AI. Features include raw data generation, ETL, data cleaning, advanced SQL analytics, executive dashboards, AI-powered ticket summarization, sentiment analysis, agreement intelligence using PDF processing, and revenue forecasting using time series analysis.

Tech Stack: SQL Server, Python, SQL, Power BI, Pandas, NumPy, OpenAI API, Git, GitHub, VS Code, REST APIs, JSON, CSV

CERTIFICATIONS

IBM Certifications: Python for Data Science | Machine Learning | Data Science Tools & Methodologies

EDUCATION

Bachelor of Technology (MEC), Kurukshetra University
